THE imagePROGRAF TM series

PERFORMANCE REIMAGINED FOR THE EDUCATION SECTOR

imagePROGRAF TM-240

imagePROGRAF TM-350

EDUCATION

Within the education sector, communication among teachers, students and staff happens every day. Whether that's the mass communication of a university campus, or a bespoke educational aid produced by one teacher, versatility and ease of use are key.

EVERYDAY EDUCATION CHALLENGES:

The printer needs to produce sizable bold prints with vivid colours that capture students' attention and help convey complex concepts, to facilitate collaborative learning.

In-house printers are not easy to set up, like setting roll paper with correct media information; job submission workflow is complicated, and misprint is highly possible, resulting in wasting time and resources. Time and resource are needed to trim margins of prints.

Most staff do not have design skills to create poster, flyers, etc. Schools, reluctant to invest additional time and funds, often opt to outsource these tasks, despite the associated costs and limited flexibility

Lack of insight into printing costs, meaning finance departments don't have an overview of actual cost for expenses control.

The printer needs to be sustainable and environmentally friendly. It also needs to operate quietly due to being in a noise sensitive teaching environment as it is crucial to minimize the impact on teaching.

HOW THE imagePROGRAF TM series CAN HELP:

PROFESSIONAL IMAGE QUALITY

With the imagePROGRAF TM series, you'll get vivid, professional quality prints. The new magenta ink helps achieve a more brilliant red, with a wider colour gamut versus competitors, resulting in more vivid colours to increase overall vibrancy of posters and collaterals.

INTUITIVE FUNCTIONALITY

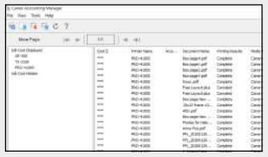
The imagePROGRAF TM series has a functional design, including a 4.3" touchscreen display with useful instructions and information, such as media type, remaining media amount and ink balance, to easily operate the printer, without much training needed.

Automatic media type and media remaining detection allows anyone to print accurately, with less waiting and effort to input media data manually. The automation also eliminates errors and misprints.

Roll paper can be replaced easily, accessing through a flat-top cover, and simply placing the roll in the feeder.

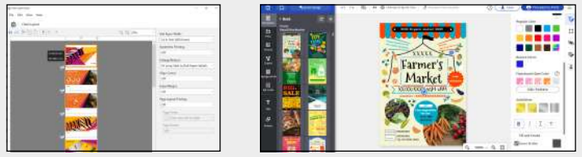
FULLY COMPATIBLE SUPPORTING SOFTWARE

Various supporting software is compatible with imagePROGRAF TM series, to streamline workflow:



Accounting Manager:
Accounting Manager: Keep your printing costs under control and in a full view by simply downloading the job logs spreadsheet, with details including the media type and consumption, the ink consumption, etc.

Free Layout Plus:
An easy-to-use software that lets users fully visualise and control how their prints are arranged on roll paper via the preview window, avoiding any accidental cropping and ensuring optimal media use. Layout can be printed with particular size or to fit the width of media roll, which is helpful in large-sized printing for MS applications, like Word documents, PowerPoint presentation slides, Excel tables, etc.



PosterArtist: Design posters with ease
Creating attention-grabbing posters, banners and flyers in striking colour has never been easier. With thousands of templates to choose from, PosterArtist lets anyone create professional and personalised posters, with no additional training required.

FREE SIZE BORDERLESS PRINTING

Save time trimming excess margins with Borderless Printing. The technology automatically detects paper edges and gives full bleed, borderless images of any size from a single roll, straight from the device.

IMPROVED SUSTAINABILITY

Environmentally conscious, the imagePROGRAF TM series features a standby power-saving function and is EPEAT Gold[1] rated for low energy consumption. The TM series operation quietly at 39dB (TM-240/340) or 41dB (TM-255/350/355) to achieve quiet teaching environment.

[1] EPEAT Gold registered in the U.S.

PRINT STAND	SD-24	N/A (included in the package)			

Whether they need intuitive functionality, streamlined workflows or a quieter environment, the imagePROGRAF TM series has a model for them. The TM-240 and TM-340 are ideal for educational institutes which print on a weekly basis, while those who print daily should opt for the TM-255, TM-350 or TM-355. Meanwhile, the HDD models such as the TM-255/TM-355 can support with printing PDF files, plus easy and efficient reprinting capabilities.
